#### **About the Data**

This report is based on publically available contract registers. It is based on data from the contract registers relating to 33 councils. This data is combined to produce a contracts dataset comprising of 15079 contracts, from 8507 suppliers, worth over £31 billion. This dataset is then used to generate useful reports, including this document.

Care must be taken when interpreting the information in this report. Councils provide varying amounts of data without a consistent standard. While care has been taken in the collation and analysing of the data, there are limitations to its accuracy and use.

#### Known problems with the data:

- **Incomplete Data** Not all councils publish their contracts as required and when they do, there are often omissions and errors.
- Supplier Matching Council contract data includes vendor references. This information is often incorrectly entered, incorrectly abbreviated, out of date, or contains additional identifying information. This makes accurate identification of a supplier difficult. To mitigate this, we use data from Companies House and complex algorithms to correctly match suppliers. Suppliers that are not matched correctly are denoted with an asterisk (\*) at the end of their name. Note that suppliers without an asterisk may have been associated with the wrong company. However, it is estimated that suppliers are matched correctly more than 80% of the time.
- **Cancelled Contracts** Councils may cancel contracts, and these are not always reflected in their updated contract registers.
- **Procurement Lots** Where a single procurement is divided into lots, each council has different ways of reporting that in their contract register. Often the individual lot allocations are bundled into a single value meaning that individual lot values are not provided.
- **Contract Value** A total contract value (TCV) represents an upper limit for a contract and not nesacarily the total cost. Similarly, annual cost calculations from TCV sometimes omit extension periods.
- **Redacted Data** Often data that personally identifies individuals is redacted, such as in the case of social workers acting as independent contractors.
- **Unintentional Errors** The council contracts registers have errors, both from their source data and their report generation. Some reports are manually created by councils, increasing risk of more errors. Also, the extract, transform, and load processes used to build this combined data set includes techniques that may introduce errors into the data.
